

## ***Instructions for completion of Resource Consumption***

The following information must be collected in a personal interview with the patient (or from review of the medical record if available).

If “no” is ticked for the question “The patient used any of the detailed resource use items during **the last 8 weeks**”, all the following questions in section A should not be filled.

## ***Instructions for completion of Inpatient hospitalisation***

- Related to Depression: The hospitalisation is considered to be related to depression if the symptoms of the disease have provoked the reason for hospitalisation, e.g. suicide attempt or accident caused by the patient’s mental state.
- If two hospitalizations occurred in the same institution (in different services or at different times), both must be recorded with first and last day for each hospitalization period.

## ***Instructions for completion of Sick leave***

If “no” is ticked for the question “The patient had any sick leave during **the last 8 weeks**”, all the following questions in section B should not be filled.

Reason: The sick leave is considered to be related to depression if the symptoms of this disease have provoked the reason for sick leave.
